TECHNICAL SKILLS

LANGUAGES

C, PHP, JavaScript, TypeScript, Python, SQL

FRONTEND

HTML5, CSS3, React, Bootstrap, Tailwind CSS, Three.js, Ifc.js

BACKEND

Laravel, PHP, REST APIs, MVC, SSO / Authentication

DATABASES

MySQL, MongoDB, Redis

TOOLS & TECHNOLOGIES

Git, GitHub, Docker, Postman, VS Code, Vim, NVim, Unix / Shell, PHPOffice

METHODOLOGIES

Agile, Scrum, Kanban, Iterative Development

CERTIFICATIONS

- Aggregation; Aggregation with Node.js — MongoDB
- Python Essentials 1; Intro to Modern AI; Intro to Cybersecurity; Computer Hardware Basics — Cisco
- Aman Hackathon Participation Certificate
- One Million Prompters — Dubai Future Foundation

AWARDS

1st Place — Aman Hackathon,
3rd Place — INJAZ Al-Maghrib
Entrepreneurship Competition
(Regional)

LANGUAGES

Arabic — Native

French — Professional Working

English — Professional Working

HISSANE Omar Adam

Full-Stack Web Developer | Future Software Engineer

Full-Stack Web Developer and aspiring software engineer, graduate of the Technicien Spécialisé program in Web Full Stack Development, building real-world applications with Laravel/PHP and React. Strong in REST APIs, databases, authentication/SSO and Git workflows, with low-level foundations in C, Unix/Shell, algorithms, memory and pointers reinforced by the 1337 Piscine.

EXPERIENCE

Field Survey & Data Collection Intern — INNOV Engineering Consulting

Morocco · SUMP of Béni Mellal · February 2026

- Collected and validated transportation and mobility data for the Sustainable Urban Mobility Plan (SUMP) of Béni Mellal.
- Produced clear technical documentation and reporting within a multidisciplinary engineering team.

EDUCATION & TRAINING

1337 (42 Network) — Piscine 2026

- Completed an intensive, hands-on programming immersion in C and Unix/Shell: daily exercises, timed exams, debugging, peer evaluation and collaborative problem solving.
- Worked with pointers, memory management, dynamic allocation, strings and arrays, recursion, function pointers, argc/argv, structures, header files, Makefiles, Git and command-line development.

Cité des Métiers et Compétences Béni Mellal – OFPPT · Graduated 2026

Technicien Spécialisé (TS) — Web Full Stack Development (DEVOWFS) · Classe d'Excellence

ISGI Khouribga · Sep 2024 – Jul 2025

Diploma in Digital Development (Développement Digital)

PROJECTS

SAC — Central Authentication Server

Laravel · PHP · MySQL · Redis · JavaScript

- Contributed to an internal centralized authentication and SSO service allowing multiple client applications to authenticate through a single central login page.
- Implemented one-time SSO tokens, server-to-server session revalidation, central logout with bounded-delay client logout, and audit logging.
- Built admin management of users, client applications, global roles, and per-application roles and permissions.

CMC Data Management System

Laravel · PHP · React · MySQL · PHPOffice

- Developed a real-world document and administrative data management system for CMC Béni Mellal, with a Laravel/PHP backend and a React frontend.
- Designed the database-backed document workflow and integrated PHPOffice for document and spreadsheet processing.

Chroma — Color Guessing Game · chroma-rosy.vercel.app

React · JavaScript · RGB · HSL

- Implemented RGB/HSL color manipulation and a color-distance algorithm scoring the difference between the player's selected color and the target color.
- Built the interactive React UI around the color-matching logic with real-time feedback.

CoBIM Cloud · cobim-cloud.vercel.app

Laravel · React · Three.js · Ifc.js

- Developed a cloud-based, BIM-focused full-stack platform with 3D web visualization and BIM-oriented workflows.
- Delivered a responsive interface through a collaborative process and deployed to Vercel.

Personal Portfolio · hissaneomaradam.dev

React · JavaScript

- Built and independently maintained a responsive portfolio showcasing projects, certifications and technical skills.
- Publishes full source for projects and the completed 1337 Piscine work on github.com/hissaneomaradam.

UniBuddy · unbuddy.me

React · Laravel · MySQL

Student collaboration platform with secure authentication, role-based user management and a REST/MVC backend.
